Senior Full Stack Developer

January 2022 - present | New York, NY

Equityzen.com - Backend Engineer

Develop visible and impactful microservices and features using Python, Django, and GraphQL APIs and a pub-sub messaging framework with deployment to the AWS Cloud. Work with product managers, data engineers, and the developer team to engineer key initiatives and end-user experiences that are used by tens of thousands of customers as well as our internal teams. Use cutting-edge technologies and domain-driven design fundamentals and introduce improvements to our stack, end-user experience, business processes, and workflows via rapid prototypes / proof-of-concepts. Recognized by consistent Exceeds Expectations ratings in performance reviews, and awarded 2022 “Zennie” award for Readiness to Teach and Learn.

February 2020 - December 2021 | New York, NY

Warner Bros. Digital Labs - Software Engineer

Developed new software features for and new implementations of a high-performance web stack in AWS running Django and microservices using Python and Django, Golang, and JavaScript, serving web, iOS, Android, and Roku clients. Served as backend development lead for DCUniverse.com, and contributed to Boomerang.com, Ellentube.com, Harry Potter Wizarding World, and other to-be-announced projects.

October 2018 - September 2019 | Boston, MA

EditShare - Linux Application Developer

Developed a Python application used for networked RAID management, a Debian Linux based operating system used to run it, and its Windows and OS X PyQt clients. Improved unit testing, integration test coverage, and CI/CD tooling, and developed an automatic deployment system for our system authentication server using Ansible.

July 2014 - December 2017 | Boston, MA

Berklee College of Music - Process & Systems Manager

Engineered database software and processes, using automated visualizations and ETL scripts, working with stakeholders across college, using Informer JavaScript, Python, MS Access, and FileMaker Pro. Planned and completed projects including integrating registration between two merging schools' student information systems, batch auditing student schedules, and supporting new programs.

June 2012 - July 2014 | Boston, MA

PeopleFluent - Implementation Consultant

Planned, deployed, and debugged system integrations using WebMethods; led post-sales enablement, capturing requirements and implementing solutions, for customers of compensation, performance, and talent acquisition SaaS offerings.

Education

August 2005 - May 2009 | Nashville, TN

Vanderbilt University - B.A.: Double major in Biological Sciences and English.
